Engineering Development Board is an apex body under the Ministry of Industries & Production, Government of Pakistan. The organization was established in 1995 and revamped in 2004, EDB today is geared to develop and promote the engineering sector of Pakistan through a multi dimensional support framework of policy initiatives, sectoral growth strategies and global networking. As a professional business entity, EDB provides an effective bridge between the Government and Industry of the country and renders professional advice to the relevant agencies for the development of engineering sector. EDB has also established a strong network with the international industrial organizations to channelize resources and expertise for the development and growth of local engineering sector to make it competitive enough to respond to the emerging needs and requirements of the fast changing world.

**Vision**

To make Pakistan a world class exporter of engineering goods & services by 2025.

**Mission**

To strengthen the engineering sector of Pakistan and integrate it with the world market to make it the driving force for economic growth.
Compiled by:
Mrs. Raazia Shakir, General Manager (BDG)
Mr. Muhammad Fiaz, Manager (BDG/IB)
Mr. Muhammad Ashraf, Manager (BDG)

Updated: 2020
It gives me immense pleasure to congratulate the Engineering Development Board (EDB) for compiling the 3rd edition of “Directory of Engineering Goods Exporters 2020”. No doubt, EDB has provided the platform to the engineering industry to promote Pakistan's engineering capabilities, potential and expertise in the local as well as International markets. There was a dire need to facilitate local engineering industry in respect of their exposition for enhancement of engineering goods export, which is now being effectively supported by EDB.

The appreciation and acknowledgment received from Diplomatic Missions in Pakistan, Pakistan Missions Abroad, Local/Foreign Chambers of Commerce & Industry and Associations in the past is testament to the importance and effectiveness of the earlier versions published in 2013 & 2015.

Over the years, this directory has become a building block for EDB in pursuit of projecting the “ENGINEERING FACE OF PAKISTAN” and reflects the core competencies and engineering capabilities existing in the country, which is a key to make inroads into the international supply chain. This pictorial directory contains profiles of 200 plus leading Pakistan's Engineering Goods and Services Exporters and serves as implicit exhibition of exportable potential of the country.

The present Government is pursuing an export oriented growth strategy for economic stability, which can be achieved only if we concentrate on the export of value added products. Our commitment is to expand International and Regional trade for which we need to promote the country's potential in order to encourage trade & investment in various sectors for economic development. Today, the world is looking at Pakistan as an emerging market for outsourcing in several sectors like energy, automotive, electronics, machinery & equipments etc. We are trying our level best to enhance exports of value added products by providing the requisite facilitation regime for the industry.

I wish EDB all the best for its success and contribution towards progress of the country.

Muhammad Hammad Azhar
The “Directory of Engineering Goods Exporters” is a much needed effort required to be undertaken for the identification and promotion of Pakistan’s engineering industry’s capabilities and potential. This indeed is a commendable initiative of Engineering Development Board (EDB) from the stand point of globally projecting the “Engineering Image of Pakistan”. I am optimistic that this export oriented publication shall contribute significantly towards export enhancement of the country.

This important compilation of leading 200 plus Pakistani engineering goods exporters featuring their offerings and other important information has laid the foundation of a database that would be expanded and updated periodically to take new organizations and companies in its fold. Domestic engineering firms dire need for such a platform from where they could effectively reach out to the global markets.

I foresee that this Directory would not only prove to be tool for enhancing the scope of trade activities but would also bring in opportunities for business development and networking among the foreign investors/companies seeking joint ventures or technical collaboration agreements with Pakistani companies.

I congratulate EDB's Business Development team for publishing the 3rd edition of “Directory of Engineering Goods Exporters 2020” and their tireless efforts to project the Engineering goods and services sector of Pakistan.

Almas Hyder
It is a matter of great pleasure to communicate my thoughts through this informative publication “Directory of Engineering Goods Exporters 2020” brought out by the Engineering Development Board (EDB). It is encouraging to note that the first two editions of this directory published in 2013 and 2015 were widely distributed and received acknowledgments from various quarters.

EDB has always been playing a leading role in strengthening and modernizing the engineering base in Pakistan. It has been instrumental in enhancing engineering goods and services exports by way of effective promotional initiatives including organizing Pakistan’s participation in international trade fairs, arranging trade delegations visits to potential countries. This publication is yet another feather in EDB cap, highlighting the countries existing capabilities to serve as a tool for enhancing the scope of trade activities and providing opportunities for business development and networking among foreign investors/companies exploring for trade partners in Pakistan.

The document is perhaps the only such authentic publication containing detailed profiles required by importers of engineering goods to further improve trade and business prospects of the country globally and for becoming a hub of sub-contracting.

The Directory contains profile/database of 200 plus exporters and reflects the efforts made by EDB for effectively promoting engineering capabilities of the local engineering industry. I am optimistic that this publication shall positively contribute towards export enhancement of the country.

I congratulate EDB’s management on their tireless efforts to promote the engineering sector's offerings, which is a key to enter international trade arena and for becoming a part of global supply chain.

Afzal Latif
The “Directory of Engineering Goods Exporters 2020” is the 3rd Edition of Engineering Development Board which took a humble start in the year 2013, with the objective to extend market expansion support to the Engineering Sector SME's as a part of its various facilitation programmes. The basic idea to compile this pictorial directory was to promote and market the country's offerings and capabilities which we feel are imperative for enhancing the scope of trade and business of exportable engineering products being produced by the local industry.

The acknowledgment that EDB received from business community, Foreign Missions and Pakistan's Missions Abroad and various local/foreign Chambers has given us a lot of encouragement to go for its regular updation. The zeal and enthusiasm of the EDB team members who contributed towards its compilation is highly commendable and I congratulate them for bringing out this informative document.

I would like to extend my gratitude to all the Industries and Associations who have responded and provided the updated profiles enabling us to compile this Directory. I hope to see further improvements in the next edition for which your valuable feedback would be appreciated. I would also like to use this platform to convey the importance of product standardization/certifications to the local industry which is a pre-requisite for export enhancement especially in developed countries. As the world is becoming more and more conscious of the quality of products, it is essential to acquire product certifications so that the importers can confidently opt for Pakistani products.

EDB, shall as always be there for any facilitation to the engineering sector exporters and looks forward to a continued and extended relationship with our industry.

Raza Abbas Shah

A & R Company

Company Profile

A&R Company is producing Flat Fin and Corrugated types of copper & brass radiators. The company also produces aluminum radiators for the OEMs’ manufacturing a wide range of cars and light commercial vehicles. They have specialized imported machines to produce best quality of radiators. The company uses raw materials from the most reputed suppliers around the world having a network of dealers throughout Pakistan for selling their products.

Core Competence

Radiators for Automobiles

Year of Incorporation 2000

No. of Employees 90

Exports

UAE, Bangladesh, Afghanistan, Africa.

PAK ELEKTRON LIMITED - PAKISTAN

Pak Elektron Limited (PEL) is the pioneer in manufacturing of electrical goods in Pakistan. It was established in 1956 in technical collaboration with M/s AEG of Germany.

PEL comprises of two divisions, Power Division & Appliances Division.

PEL Power Division produces:
- Power Transformers up to 60MVA, 132kV Class
- Distribution Transformers (oil and dry types) up to 10MVA, 36kV
- MV Switchgear up to 2500A, 24kV
- LV Switchgear up to 6000A, 750V
- Digital Energy Meters (1 phase & 3 phases) with or without GPRS/Modem
- Instrument Transformers up to 15 kV Voltage Class

PEL Transformers have been exported to the following countries:
- Jordan
- KSA
- Qatar
- Swaziland
- Yemen
- South Africa
- Afghanistan
- Kenya
- Nepal
- Tanzania

Designs are properly adapted to Modern Manufacturing Technologies aimed at maintaining the highest quality standards and keeping costs competitive. Advanced computational techniques are backed up by experimental verification to ensure quality of design and manufacturing processes. Comply with the requirements of international standards and regulations of IEC, BSS, ANSI and VDE.

LOCATION: Lahore – Pakistan

EMPLOYEES: > 7000

ANNUAL PRODUCTION CAPACITY:
- Transformer: 7000 MVA
- Switchgear: 12000 units
- Energy Meter: 1,700,000 units

PEL Appliances Division produces:
- Refrigerators (new models with inverter technology)
- Air Conditioners (new models with inverter technology)
- Deep Freezers
- Microwave Ovens
- Water Dispensers

Tesla Industries (Pvt) Limited

Company Profile

Tesla Industries (Pvt) Limited is one of the leading manufacturers of CNG Equipments, Electrical Control Devices and Regulation Equipments, Electrical Control Devices and Regulation Equipments. The company’s products are approved by the British Electro-Technical Approval Board (BEAB) and Gas (Advantica). It has the honor of being the only such facility in the world to carry the British Gas Logo on its relevant products. The company’s product line includes Solar Panels, CNG Dispensers, CNG Kits, Electrical Elements, Thermostats, Towel Rail Elements, LPG/CNG Hoses & Sockets.

Core Competence

Domestic Electric Appliances, Pumps, CNG/LPG Equipment and Solar Panels.

Year of Incorporation
1992

No. of Employees
250

Exports
China, USA, Indonesia, Singapore and Bangladesh, UK, Australia and Dubia.

Certification
ISO 15500, BS 669, EN 60 335-2-73, NFPA-58

AMBER Capacitors Limited

Company Profile
AMBER Capacitors Limited is one of the largest Capacitor manufacturing companies in Pakistan. The company has excellent manufacturing and testing facilities as well as capabilities in-house design and manufacture of full-range of AC Capacitors. Amber’s range of products includes Motor Start-Run capacitors in match-box as well cylindrical designs, Capacitors for air-conditioners, Capacitors for Power Factor Correction of Ballasts for Fluorescent and High Intensity Discharge Lamps, Capacitors for Power Factor Correction of Three Phase Power Systems up to 1000 V in dry as well as oil impregnated (non-P.C.B.) designs, Capacitor for mains frequency induction furnaces.

Core Competence
Manufacturer of Electrical Goods.

Khawaja Electronics (Pvt.) Limited

Company Profile
Khawaja Electronics (Pvt.) Limited (KEL) specializes in the manufacturing of metallized polypropylene film and Electrolytic capacitors for AC applications, LV & HV Capacitors for Power Factor Correction under the registered trademark of “FUJI”. The company sells its products worldwide, principally to original equipment manufacturers (OEMs), for use as components in electrical and electronic products. Applications include air-conditioners, refrigerators, electric fans, motors, fluorescent and high intensity discharge (HID) lighting, and industrial electrical systems.

Core Competence
A.C. Capacitors, Electrolytic Capacitors, Fluorescent Lamp Capacitors, LV & HV Capacitors

Year of Incorporation: 1980
No. of Employees: 500
Exports: Middle East, Africa, Bangladesh and Sri Lanka.
Certification: ISO 9001, UL

Smart PCBs

Company Profile

Smart PCBs was established in 2005 and it has grown into a leading hi-tech PCBs manufacturing company of Pakistan. It deals in printed circuit board production upto 16 layers, with both HASL and ENIG surface finish, for use in various hi-tech electronic devices. Furthermore, SMT assembly services, also known as PCB-A, are available for fine-pitch components including BGAs. The company differentiates itself from other competitors in experienced workforce, superior quality and advanced equipment.

Core Competence

Single/Double/Multi-layer Printed Circuit Boards in HASL/ENIG surface finish and SMT Assembly (PCB-A)

Year of Incorporation: 2005
No. of Employees: 101
Exports: Printed Circuit Boards.
Certification:

Forgings & Castings
Bolan Castings Limited

Company Profile
Bolan Castings Limited (BCL) through constant research and immaculate quality control, has set new standards for the manufacture of grey and ductile iron castings mainly for Tractors and Trucks/ Buses. BCL has so far developed over 180 different types of Castings, ranging from 10 kg to 150 kg. by weight and from the simplest to the most intricate in shape. Whatever the size or shape, BCL Castings are the best and meet the highest international standards. The product line includes Grey Iron Castings: Tractor’s Engine Blocks Engine Heads, Centre Housings, Transmission Case, Axle Casing, Oil Sump, Bearing Caps, Truck’s / Bus’s / Car’s, Brake Drums Pump Castings. Spheroidal Graphite/Nodular/Ductile and Iron Castings: Axle Housings, Axle Supports, Differential Cases, Hydraulic Boxes, Rocker Links, Sleeves, Hubs and Bearing Covers etc.

Core Competence
Grey & SG Iron Castings for Automotive, Tractor & Truck Industry.
